The plan!

I am going to attach the interviews to the pros and the cons by splitting them up and I am going to attach pictures of some babies or people in my life that I interviewed and also some crazy fonts and I want some colors that are kinda basic maybe a bunch of blues and some neons but whos to say - I know that I want my website to have lots of crazy animations because it makes it fun for me to code and I would love to be crazy funny crazy with this project.

Logan Silvers

Heyyo - I have made this slideshow in order to example the **clothing** and **identity** that I would like to purchase for myself, my house, and home.

I am also in the process of rebranding my entire identity and what I want to do when I am older, because other than **cold hard cash** I lack the skill to make critical decisions like that.

You should know that my main interests are **fish** and aquaponics and **under the sea** themed elements, as well as my dog ginger, and **horticulture**, and i also enjoy crocheting and fiber arts as well as metal jewelry and **funky beads** and collectible trinkets.
I'm a collector!
