Required length: 600 words** wordstopages.com (<http://wordstopages.com/>)Read the following: [404 Page Not Found ↗ \(https://thebaffler.com/salvos/404-page-not-found-wagner\)](https://thebaffler.com/salvos/404-page-not-found-wagner)

This is journalist Kate Wagner's essay on how the internet has evolved from an open, universal platform to something less savory.

Create a written response to this essay, **and don't forget to reference (quote) specific ideas from the writing.** You are welcome to focus on one of her subsections in this essay.

Publishing

Instead of turning this paper in as a .doc or .pdf, you will create an HTML webpage.

Use this HTML template: [assignment1.html \(https://canvas.colum.edu/courses/33502/files/5300568?wrap=1\)](https://canvas.colum.edu/courses/33502/files/5300568?wrap=1) ↴
[\(https://canvas.colum.edu/courses/33502/files/5300568/download?download_frd=1\)](https://canvas.colum.edu/courses/33502/files/5300568/download?download_frd=1)

Assignment 2, which I will cover next week, will involve writing the CSS decoration for this webpage. You needn't worry about the CSS this week.

Writing your HTML

1. Create a document title inside of your <title>.
2. Paste all of your text in-between the <div id="container"> and the closing </div>

Use the following formatting:

```
<header>
```

```
<h1>...your title...</h1>
<h2>...your name and date...</h2>
</header>
<main>
    ...your writing here, with proper <p></p> paragraph formatting...
</main>
<footer>
    ...copyright info: use © or ® for the copyright symbol...
</footer>
```

3. If you need italics, use .
4. If you need boldfacing, use .

Proofreading

If you had originally typed your text in another application (such as a word processor), there is a good chance that certain non-alphanumeric characters have been misencoded. In your browser window, misencoded characters will show up as junk characters/symbols.

Common offenders:

- " (quotation marks) — retype these if they look curved
- ' (apostrophes) — retype these if they look curved
- ... (ellipses) — retype these
- (em-dash) — replace with — or —
- (en-dash) – replace with – or –

Naturally, your writing should be free of misspellings as well.
