⌄ **Details**

For this assignment you will be creating a brand new site from scratch.

Take something that you are a "fan" of and build a site about it. My example site is for Quentin Tarantino.

Reference repository: **https://github.com/voporak5/web-development-1/tree/week-4** ▤ **(https://github.com/voporak5/web-development-1/tree/week-4)**

Reference site: **https://voporak5.github.io/web-development-1/** ▤ **(https://voporak5.github.io/web-development-1/)**

Your site can be about food, Pokemon, cat behaviors, anything.

The main purpose is to give you an opportunity to build something using Bootstrap.

If you'd like to get a **B** grade then you just need to do a single page.

If you'd like to get an **A** grade then you need **3** pages.

My Quentin Tarantino site is barely a **B** and that's I didn't have much time to put into it.

You'll also notice the site is not built using Bootstrap so you will not be able to copy the source code and use it for yourself.

Use color schemes, images, fonts, to bring your site to life.

Add this site as a new page that can be accessed from your class website you've already made.

Submit your class website link so I do not have to find it when you are finished

After you push your HTML/CSS to your GitHub or web server, TEST IT. Make sure images load correctly and links open as intended.

A point will be deducted if links don't function or images do not load...
